

Manjith Madhusudanan

AWS DevOps Engineer

☎ +1-210-717-7889 ✉ zmanjith@gmail.com 🌐 github.io/zmanjith 📍 San Antonio, TX

SUMMARY

DevOps Engineer with 2+ years of hands-on experience in building and managing CI/CD pipelines, automating infrastructure with Terraform and CloudFormation, and deploying containerized applications using Docker and Kubernetes (CKA certified). Proficient in AWS services including EC2, EKS, S3, IAM, and CloudWatch, with strong skills in GitHub Actions, Jenkins, and monitoring tools. Designed and implemented an end-to-end CI/CD pipeline with GitHub Actions, Docker, Kubernetes, Helm, Nexus, Prometheus, and Grafana. Worked with AWS DevOps tools (CodePipeline, CodeBuild, CodeDeploy) to evaluate cloud-native CI/CD capabilities. Certified AWS Solutions Architect – Associate, with a solid background in scripting (Bash, Python) and infrastructure as code. Backed by over 20 years in IT, bringing depth in system integration, project leadership, and operational reliability

EXPERIENCE

DevOps Cloud Engineer

Terradyne Infotech

📅 04/2024 - Present 📍 Flemington, IL

Terradyne Infotech is a software development outsourcing company, delivering products ranging from web, mobile, cloud applications to complex back-end solutions, mainly for the US market.

- Designed and implemented a fully automated CI/CD pipeline for a Java-based microservice using GitHub Actions and Docker.
- Designed and implemented a cloud-native support ticket management tool in Java (Spring Boot), streamlining global issue tracking for SAP consultants.
- Built an end-to-end CI/CD pipeline using GitHub Actions, Docker, Kubernetes, Helm, and Nexus, automating build, test, containerization, and deployment.
- Conducted a POC on AWS DevOps tools (CodePipeline, CodeBuild, CodeDeploy) to evaluate cloud-native CI/CD capabilities alongside on-prem deployments.
- Deployed monitoring with Prometheus and Grafana, enabling proactive alerting, performance insights, and faster ticket resolution across global support teams.
- Containerized the application and deployed it on an on-premises Kubernetes cluster using Helm for scalable and resilient orchestration.
- Integrated Prometheus and Grafana for real-time monitoring and alerting; configured rollback mechanisms based on health checks.
- Leveraged open-source tools exclusively to maintain cost-efficiency and full control over infrastructure.
- Achieved a 40% reduction in deployment time and improved release reliability across environments.
- Collaborated with SAP support teams and developers to streamline feedback loops, enabling faster resolution of incidents and proactive application enhancements through automated pipelines.

SKILLS

Cloud services

AWS-ECS	AWS Lambda		
CloudFormation	S3	IAM	EC2
CodePipeline			

Programming Skills

Shell Script	YAML	Bash	Python
--------------	------	------	--------

Tools

Terraform	Docker	Kubernetes	
Ansible	ArgoCD	Jenkins	Git
Linux	Helm		

CERTIFICATIONS

Certified Kubernetes Administrator

LNFC, 2024

AWS Cloud Architect Associate

AWS, 2023

SAFe Agilist

2022

STRENGTHS

Collaboration

Proven track records of bridging the gap between development and operations teams

EXPERIENCE

DevOps Practitioner

EY

📅 05/2022 - 2023 📍 India

EY (Ernst & Young) is a global leader among the Big Four accounting firms, known for delivering assurance, tax, consulting, and advisory services to help businesses navigate complex challenges and drive growth.

- Designed and deployed a scalable microservices architecture on AWS EKS, enabling seamless integration of multiple supply chain applications within a unified web portal.
- Re-architected the application using ReactJS (frontend) and Node.js (backend) microservices.
- Containerized services with Docker and deployed on AWS EKS for high availability and scalability.
- Designed and implemented CI/CD pipelines using GitHub Actions, enabling automated build, test, and deployment workflows.
- Integrated SonarQube for continuous code quality and security analysis.
- Utilized Amazon S3 for static asset hosting, Amazon RDS (MySQL) for data storage, and AWS CloudWatch for centralized logging and monitoring.
- Established event-driven integration with SAP via third-party APIs to ensure seamless data flow into the microservices ecosystem.
- Reduced deployment time and manual errors through automation.
- Enabled scalable performance to support global users across multiple time zones.
- Improved release agility by 60% and environment consistency by containerizing components with Docker and Kubernetes.

Agile Consultant, Technical Manager

EY

📅 10/2012 - 2022 📍 India

EY (Ernst & Young) is a global leader among the Big Four accounting firms, known for delivering assurance, tax, consulting, and advisory services to help businesses navigate complex challenges and drive growth.

- Manage development, staging, and production environments, ensuring smooth deployments and minimizing downtime.
- Led the implementation of the SAFe Framework across the organization, involving over 15 departments, including procurement, logistics, and manufacturing, and engaging key business stakeholders in 5 countries.
- Organized resolute Scrum Teams for each business unit, ensuring they managed prioritized backlogs discussed and updated by their respective departments using Azure DevOps.
- Microservices-based architecture with Enterprise Bus communication make integration between layers, through the integration layer handling bonding
- Collaborate with multiple Scrum Teams, like integration, CRM (Dynamic 365), reports, and business rules (Camunda) etc., to align sprint goals and timelines. Share progress, challenges, and dependencies during Scrum of Scrums ceremonies.
- Orchestrated integration of front end layer, with Master Data management in D365 through business rules in Camunda BRE, focusing on modernizing Human Resource department services.

STRENGTHS

Problem-solving

Adept at identifying bottlenecks, troubleshooting issues quickly

Adaptability

Stays current with evolving tools and methodologies, quickly adapting to new technologies and dynamic project requirements

EDUCATION

B.S. Computer Science

University of Kerala

📍 India

M.S. Computer Science

Periyar University

📍 India

Technical Consultant, Scrum Master

UST

📅 08/2005 - 09/2012 📍 India

UST is a global digital and IT services company. It delivers innovative technology solutions with a focus on agile, cloud, and enterprise apps.

- Equifax, one of three major Credit Rating agencies in US, concentrating primarily on Employment Verification services within this sector, had acquired TALX, a competitor firm.
- Maintaining more than 20 applications that ran for their daily business. Moreover, developing new applications to replace legacy systems in TALX.
- Delivered Support Services based on agreed Service-Level Agreement to 20 applications
- The project utilized Managed Services Model with Transition Methodology for maintenance and support projects, while Scrum Methodology for development.
- Developing new applications within an integrated MVC2 framework using .NET and MS SQL database posed significant challenges. The extensive use of ASP components complicated the project, making the migration process far from smooth
